Water Leak Testers are the devices that are used to detect the leakage of water from the pipelines or the systems. They can be installed in offices, manufacturing units, and residential areas for testing the leakage of water to avoid the hazards due to the water leakage. Water leakage majorly causes the loss of water but also adversely affects the coloration of walls, flooding, and poor water quality.

Fixed water leak detectors can be fixed to any water pipeline through which the water leakage can be detected, and they can give alarms if any leakage is diagnosed which can be very helpful to prevent the hazards due to the water leakage.

The global market for Fixed Water Leak Detectors is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028.
