Polycarbonate (PC) stands out as a remarkable thermoplastic material, characterized by its colorless and transparent nature, making it an ideal choice for various applications. As a widely used thermoplastic, PC boasts exceptional attributes such as lightness, durability, impact resistance, and high-temperature tolerance. Its versatility extends to excellent optical clarity and outstanding electrical insulation properties. Flame Retardant PC takes the inherent qualities of PC to the next level by incorporating flame retardancy. By combining with fire-retardant additives, we get a new type of PC plastic, which still retains its original excellent properties and has additional fire resistance.

Global manufacturers of Flame Retardant Polycarbonate include Sabic?Mitsubishi Engineering-Plastics Corporation?Covestro?Teijin?LG Chem?Idemitsu Kosan?CHIMEI and etc. And the top five manufacturers account for about 71% of the market share. Asia-Pacific is the largest market with a share of about 64%, followed by Europe and North America with 18% and 14% respectively. In terms of product type, UL94V-2 is the largest segment, accounting for about 64% of the share. And in terms of application, Electronics is the largest downstream field, accounting for 56% of the share.
