The global Flat Panel Display Equipment market size is predicted to grow from US\$ 20100 million in 2025 to US\$ 24300 million in 2031; it is expected to grow at a CAGR of 3.2% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Flat panel display equipments are set of equipment used by FPD manufacturers to manufacture displays for their different product groups. For instance, Samsung uses FPD equipment to manufacture FPDs for products ranging from TVs to smartphones and tablets. The equipment includes CVD systems, sputter systems, etch and ash systems, coater and developers, and array and inspection systems.

Though the market is currently dominated by the LCD segment, the constantly reducing prices of OLED and the increasing demand for smartphones and tablets with active-matrix organic light-emitting diode (AMOLED) will result in increasing the shares of the AMOLED segment, which will dominate the market by the end of the predicted period. Also, the decreasing demand for PCs will further reduce the demand for LCD monitors, in turn, augmenting the shares of the AMOLED segment.
