Abstracts

The global Flexible Employment Enterprise Service Platform market size is predicted to grow from US$ 118410 million in 2025 to US$ 208110 million in 2031; it is expected to grow at a CAGR of 9.9% from 2025 to 2031.

The flexible employment enterprise service platform is a digital platform that provides enterprises with a full-process solution for flexible employment. It aims to help enterprises manage flexible employment relationships more efficiently, improve employment efficiency, and reduce employment costs and risks. The platform is a bridge connecting enterprises and flexible workers. It combines traditional human resource management with Internet technology, breaks the limitations of traditional employment models, and provides enterprises with a more flexible, convenient and efficient way of employment. At the same time, it also provides more job opportunities and flexible work options for flexible workers.

The flexible employment enterprise service platform has the following core functions:

? Talent recruitment and matching: It has a huge talent pool covering information on flexible workers in various industries and skill fields. Through intelligent matching algorithms, according to the employment needs released by the enterprise, such as job requirements, working hours, work location, etc., suitable candidates are quickly screened and pushed to the enterprise, helping the enterprise to quickly find flexible workers who meet the requirements.

? Contract and file management: Support online signing of electronic contracts to ensure the efficiency and legal effect of contract signing. At the same time, the contract

information between enterprises and flexible workers is centrally managed, including key information such as the start and end time of the contract, work content, and remuneration, so that enterprises can check and manage it at any time. In addition, electronic files are established for flexible workers to record their work experience, performance evaluation and other information.

? Salary and tax management: According to the salary calculation method agreed upon by the enterprise and flexible workers, such as hourly billing, project billing, etc., the salary is accurately calculated and paid on time. At the same time, the platform also provides tax declaration and planning services. According to national tax policies, it reasonably calculates and withholds personal income tax, helping enterprises and flexible workers reduce tax risks and optimize tax costs.

? Attendance and performance management: Provides a variety of attendance methods, such as positioning punching, face recognition punching, etc., to facilitate enterprises to manage the working hours and attendance of flexible workers. At the same time, it can also evaluate and assess the work performance of flexible workers according to the performance indicators set by the enterprise, providing a basis for the company to pay salaries and renew contracts.

? Risk management and compliance support: Pay close attention to changes in labor laws and regulations, provide compliance consulting and guidance to enterprises, and ensure that the flexible employment behavior of enterprises complies with legal requirements. At the same time, by establishing a risk warning mechanism, early warning and prevention of possible labor disputes and tax risks can be carried out to help enterprises reduce employment risks.

The flexible employment enterprise service platform helps enterprises quickly adapt to market changes, flexibly adjust the scale and structure of employment according to business needs, and reduce fixed employment costs. At the same time, it reduces the human resource investment of enterprises in recruitment, training, management, etc., and improves the operational efficiency of enterprises. In addition, through the compliance management of the platform, the legal and tax risks of enterprises are reduced. For flexible workers, the platform provides them with more job opportunities and choices. They can freely choose work projects that suit them according to their time and skills. At the same time, the platform ensures the timely settlement and payment of wages and protects the legitimate rights and interests of flexible workers.
