Flexible employment refers to the rapid adjustment, precise matching, and flexible management of the human resources team of an enterprise through short-term or project-based employment based on business needs or business requirements. The essence of the flexible employment model is a process of achieving refined division of labor by decomposing tasks and integrating resources.

The flexible employment platform is a third-party platform that effectively matches employees with the human resource needs of enterprises. The flexible employment platform can effectively solve the employment problems of enterprises and allow enterprises to focus on business development. For enterprises, the basis of the flexible employment platform lies in whether the process is compliant, whether the personnel can be accurately matched with actual needs, and finally solve the problems of salary payment and tax saving.

United States market for Flexible Employment Platform is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.
