## Abstracts

The global Flexible Printed Circuit Boards (FPCs) for Electric Vehicles market size is predicted to grow from US\$ 2769 million in 2025 to US\$ 4939 million in 2032; it is expected to grow at a CAGR of 8.6% from 2026 to 2032.

Flexible Printed Circuit Boards (FPCs) for Electric Vehicles are polyimide- or PET-based flexible circuit boards used in EV battery systems, power electronics and in-vehicle electronics. They replace traditional wiring harnesses and some rigid PCBs in high-density, space-constrained, vibration-intensive environments such as battery modules, BMS, inverters, charging systems, sensors, lighting and infotainment. They offer light weight, high reliability, design flexibility and simplified assembly, and must meet automotive-grade standards (HV isolation, heat, vibration, humidity, lifetime). In 2025, global Flexible Printed Circuit Boards (FPCs) for Electric Vehicles production reached approximately 12954.7 K Sqm. Global production capacity in 2025 is approximately 17000 K Sqm. The main raw materials include PI film (Polyimide Film, represented by manufacturers: DuPont, Kaneka, UBE); electrolytic copper foil/rolled copper foil (ED/RA Copper Foil, represented by manufacturers: JX, Furukawa, Fukuda, Jiayuan, Nord); and coverlay/adhesive materials. Downstream applications and customers include: Tier-1 automotive electronics manufacturers (Bosch, Continental, ZF, Denso); and OEM vehicle manufacturers (Volkswagen Group, Toyota, Tesla, and BYD), etc.

Flexible Printed Circuit Boards (FPCs) for Electric Vehicles are rapidly shifting from a consumer-electronics derivative to a strategic interconnect platform underpinning EV energy systems, sensing, and cabin electronics. Structural demand is driven by rising BEV penetration, electronic content per vehicle, wiring-harness weight reduction, higher BMS sensing points, curved interior displays, and expanding ADAS sensor density. As a result, FPC adoption is accelerating in battery-module/BMS measurement lines,

power-electronics control units, automotive camera and radar modules, intelligent lighting, infotainment and large-format displays.
