The research report highlights the growth potential of the global Floating Solar System market. Floating Solar System are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Floating Solar System. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Floating Solar System market.

Floating solar or floating photovoltaics (FPV), sometimes called floatovoltaics, is solar panels mounted on a structure that floats on a body of water, typically a reservoir or a lake. Floating solar systems help landowners benefit from otherwise underused bodies of water, such as coal quarries, mineral extraction pits or reservoirs. As opposed to conventional rooftop solar panels, floating ones perform between 5% to 15% better because of the cooling effect of the water, and are not impacted by shading from other buildings.

Global key floating solar system players include Sungrow, Ciel and Terre and BayWa r.e. etc. The top 3 companies hold a share about 59%. Asia-Pacific is the largest market with a share about 81%, followed by Europe and South America.

In terms of product, PV Modules is the largest segment with a share about 44%. And in terms of applications, the largest application is utility with a share about 87%.
