The global Floor-Standing ELISA Workstation market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Floor-standing ELISA workstation is a laboratory equipment specifically designed for enzyme-linked immunosorbent assay (ELISA) testing. It consists of a tall, vertical stand with multiple shelves for holding ELISA plates, reagents, and other essential laboratory supplies. The workstation may include various components such as automatic dispensers, washers, incubators, and readers to streamline the ELISA testing process. The workstation helps in increasing laboratory efficiency and reducing the risk of errors by providing a dedicated workspace and optimal conditions for carrying out ELISA testing.

the market outlook for floor-standing ELISA workstations is expected to be positive due to the growing demand for high-throughput and automated ELISA testing in various industries such as healthcare, pharmaceuticals, and biotechnology. The increasing prevalence of chronic diseases such as cancer and autoimmune disorders also drives the need for better diagnostic tools and technologies. Additionally, the rising adoption of ELISA assays in research laboratories and academic institutes further fuels the market growth.
