The global Floss Pick market size is predicted to grow from US\$ 647 million in 2025 to US\$ 811 million in 2031; it is expected to grow at a CAGR of 3.8% from 2025 to 2031.

A dental floss pick is a small plastic tool with a curved end that holds a piece of dental floss. And there's a bonus—the other end of a floss pick features a small plastic pick that can be used instead of a wooden toothpick to remove large food particles that can get caught along the gum line or between the teeth.

The floss pick market is primarily driven by increasing awareness of oral hygiene and rising dental health issues like plaque buildup and gum disease. Consumers are seeking more convenient, easy-to-use alternatives to traditional floss, making floss picks a popular choice. Additionally, busy lifestyles and growing health consciousness are encouraging people to adopt products that offer quicker, effective solutions for oral care, fueling the demand for floss picks.

On the other hand, environmental concerns pose a significant challenge for the floss pick market. Most floss picks are made from single-use plastics, which contribute to waste and pollution. As consumers become more eco-conscious, there is a rising demand for sustainable alternatives, such as biodegradable or reusable floss picks. The competition from other oral hygiene products, including interdental brushes and water flossers, also presents challenges, as consumers have more options to choose from based on their specific needs.

The classification of Floss Pick includes F Shape and Y Shape. The proportion of F Shape in 2023 is about 84%. Asia-Pacific is the largest consumption place, with a consumption market share nearly 31% in 2023. Following Asia-Pacific, North America is

the second largest consumption place with the consumption market share of about 30% in 2023. Procter & Gamble, Prestige Consumer Healthcare Inc, Johnson & Johnson, Perrigo, Sunstar Etc. are the leader of this industry.
