Both bulbs and tubers are used by plants as a way to survive harsh conditions such as drought or cold temperatures.

The flower bulbs and tubers market is experiencing a growing trend, with increasing demand for these products in various regions around the world. Major sales regions for flower bulbs and tubers include Europe, North America, and Asia Pacific, with Europe leading the market in terms of market concentration. The market offers various opportunities for growth, such as the increasing popularity of gardening and landscaping activities, as well as the rising trend of urban gardening.
