Abstracts

The global Fluorine-Free Firefighting Foam Concentrates market size is predicted to grow from US\$ 569 million in 2025 to US\$ 762 million in 2032; it is expected to grow at a CAGR of 4.3% from 2026 to 2032.

Fluorine-Free Firefighting Foam Concentrates (F3) are concentrated liquid fire-extinguishing formulations that contain no intentionally added fluorinated surfactants, including PFAS-based ingredients, and are designed to be proportioned with water and aerated to generate a stable foam blanket for fire suppression. They are primarily used for Class B flammable-liquid fires involving hydrocarbons such as gasoline, diesel, jet fuel, and crude oil, while alcohol-resistant fluorine-free formulations can also be used on water-miscible polar solvents such as alcohols, ketones, and esters. Unlike conventional AFFF, fluorine-free foams generally extinguish fires through a durable foam blanket rather than formation of a fluorinated aqueous film, thereby isolating the fuel surface from oxygen, suppressing vapor release, providing cooling, and reducing the risk of re-ignition.

Key Findings

Fluorine-Free Firefighting Foam Concentrates are moving from specialty alternatives toward mainstream Class B fire protection in regulated end markets

Synthetic Fluorine-Free Foam is the principal product platform, while protein-based formulations serve more specialized performance and procurement requirements

Petrochemical Plant Fire Suppression and Oil & Gas Terminal Fire Protection form the core industrial demand base

Europe and North America are at the forefront of transition, while Asia-Pacific offers expanding replacement and new-build opportunities

Market Trends

The development direction of Fluorine-Free Firefighting Foam Concentrates is shifting from simply eliminating fluorinated chemistry toward achieving a more balanced combination of extinguishing efficiency, burn-back resistance, foam stability, equipment compatibility, storage stability, and environmental performance. Regulatory changes are increasingly converting environmental compliance from an optional purchasing consideration into a core product-selection criterion. In October 2025, the European Commission adopted restrictions on PFAS in firefighting foams with sector-specific transition periods, while the U.S. Federal Aviation Administration continues to support the transition of aircraft rescue and firefighting operations toward fluorine-free foam technologies. As a result, product development is increasingly focused on higher-performance synthetic formulations, improved foam drainage and burn-back characteristics, compatibility with existing proportioning and delivery systems, and products capable of serving multiple fuel-risk environments. End users are also paying greater attention to the total transition process, including system cleaning, concentrate replacement, equipment calibration, training, inventory management, disposal of legacy foam, and operational validation. This change is gradually moving competition from formulation supply alone toward integrated product performance, technical support, certification capability, and transition-service competence.

Market Dynamics

Drivers

Demand growth for Fluorine-Free Firefighting Foam Concentrates is primarily driven by the replacement of fluorinated firefighting foams, tightening environmental requirements, modernization of industrial fire protection systems, and stronger safety requirements in high-risk flammable-liquid environments. The regulatory transition is especially relevant to airports, petrochemical facilities, fuel terminals, marine operations, and other sites where firefighting foam inventories and fixed systems have traditionally relied on fluorinated formulations. The European Union's phased restriction of PFAS in firefighting foams and the continued U.S. aviation-sector transition toward F3 solutions provide direct structural support for replacement demand. Beyond regulation, operators increasingly require foam products that combine environmental compliance with reliable

extinguishment, acceptable burn-back resistance, long storage life, and compatibility with existing equipment. Expansion and upgrading of oil, gas, petrochemical, aviation, marine, and industrial infrastructure also create incremental demand for new foam inventories and fire suppression systems.

Restraints

The main restraint for Fluorine-Free Firefighting Foam Concentrates is that replacement is not always a simple one-for-one chemical substitution. Foam performance depends on fuel type, application rate, expansion characteristics, discharge equipment, water quality, system configuration, and operating procedure. Users may therefore need to conduct system testing, adjust proportioning equipment, revise firefighting procedures, or modify discharge hardware when replacing legacy foam. The need to remove residual fluorinated concentrate from tanks, pipelines, pumps, vehicles, and fixed systems can further increase conversion cost and operational complexity. For applications involving large hydrocarbon fires or demanding burn-back conditions, buyers tend to adopt conservative qualification procedures because firefighting performance has direct safety implications. These factors can lengthen product approval cycles and reduce the speed of replacement, particularly at facilities where existing systems remain technically functional and capital budgets for conversion are constrained.

Opportunities

The most significant opportunity lies in the large installed base of fluorinated firefighting foam systems that will require gradual replacement, generating demand not only for new Fluorine-Free Firefighting Foam Concentrates but also for testing, system conversion, equipment optimization, training, and maintenance services. Airports represent an important transition opportunity because fluorine-free foam is increasingly becoming part of formal aircraft rescue and firefighting transition programs. Petrochemical plants and oil and gas terminals provide another attractive opportunity because their large inventories of flammable liquids require high-performance foam protection and frequently involve substantial volumes of concentrate in fixed or mobile systems. Product opportunities are also emerging around concentrates offering lower proportioning rates, improved storage efficiency, broad fuel compatibility, better cold-temperature behavior, and enhanced burn-back resistance. Suppliers able to combine qualified formulations with technical support for transition, system compatibility evaluation, and application engineering are positioned to capture a larger portion of customer value than suppliers competing primarily on concentrate price.

Challenges

The principal long-term challenge is maintaining reliable fire performance while formulations are redesigned around non-fluorinated chemistry. Different Fluorine-Free Firefighting Foam Concentrates can behave differently depending on foam generator design, expansion ratio, application technique, fuel properties, and environmental conditions, making standardized substitution difficult across all installed systems. FAA testing has also demonstrated that discharge configuration can influence F3 firefighting performance, highlighting the importance of matching concentrate characteristics with application equipment and operating procedures. Manufacturers must therefore sustain investment in formulation development, fire testing, certification, raw-material qualification, and application engineering. At the same time, an expanding supplier base may increase price competition before formulations, standards, and end-user preferences fully converge. Producers must also manage potential reformulation risks if environmental definitions, prohibited substance lists, testing requirements, or customer procurement specifications continue to evolve.

Industry Chain Analysis

The upstream industry chain for Fluorine-Free Firefighting Foam Concentrates consists primarily of hydrocarbon surfactants, specialty surfactants, foam stabilizers, solvents and coupling agents, polymers, corrosion-control additives, preservatives, water-treatment inputs, protein-derived materials for relevant formulations, packaging materials, and intermediate chemical processing services. Product performance depends heavily on the balance among foaming ability, spreading behavior, drainage time, viscosity, burn-back resistance, storage stability, and compatibility with proportioning systems. Consequently, specialty formulation ingredients and performance additives generally create greater technical value than commodity inputs. Raw-material qualification is particularly important because relatively small formulation changes can affect extinguishing behavior and certification results. Packaging and logistics are also relevant because concentrates are supplied to emergency-response applications that require long shelf life, traceability, controlled storage, and reliable availability.

The midstream segment covers formulation design, blending, quality control, fire-performance testing, certification, filling, packaging, technical documentation, and application engineering. Value creation increasingly extends beyond manufacturing toward equipment compatibility, system-conversion support, commissioning, training,

and lifecycle management. Downstream customers include petrochemical plants, oil and gas terminals, airports, marine vessels, industrial operators, emergency-response organizations, and other users operating foam-based fire protection systems. The industry's profit structure is therefore influenced not only by formulation cost but also by certification investment, specialized testing, production scale, distribution capability, customer qualification cycles, technical service resources, and the ability to secure long-term supply relationships. Suppliers with established fire-protection channels and application-engineering capabilities can generally create more value per customer than concentrate-only suppliers.

Segment Insights

Synthetic Fluorine-Free Foam represents the central development direction within Fluorine-Free Firefighting Foam Concentrates because synthetic formulation platforms offer manufacturers substantial flexibility in controlling foam generation, viscosity, spreading, drainage, fuel tolerance, storage stability, and compatibility with different firefighting systems. Continued improvements in surfactant systems and formulation engineering are strengthening its position in industrial and aviation applications. Competition within this segment is increasingly based on certified fire performance, burn-back resistance, proportioning efficiency, low-temperature operability, and compatibility with existing hardware rather than the fluorine-free attribute alone. As users become more experienced with F3 conversion, procurement specifications are expected to place greater emphasis on demonstrated performance under specific fuels and discharge configurations.

Protein-Based Fluorine-Free Foam serves a more specialized segment where customers value stable foam blankets, heat resistance, and established protein-foam performance characteristics. Its market opportunity is more application-specific than the synthetic segment, while Others provide room for bio-based, hybrid, and emerging formulation technologies. Across all product categories, the strongest commercial opportunities are likely to concentrate in formulations that can reduce conversion complexity while satisfying stringent fire-performance requirements. Products capable of operating effectively through existing proportioning equipment or across a wider range of fire scenarios can lower total conversion costs for end users and improve their competitiveness in replacement projects.

Downstream Market Opportunities

Downstream opportunities are concentrated in locations where large quantities of

flammable liquids create potentially high-consequence fire events. Petrochemical Plant Fire Suppression remains a key demand area because refineries, chemical processing units, tank farms, loading areas, and related infrastructure require reliable vapor suppression, rapid fire control, and resistance to re-ignition. Oil & Gas Terminal Fire Protection is similarly important because bulk storage tanks, transfer facilities, pipelines, and loading terminals often rely on fixed and mobile foam systems. Aviation Airport Crash Rescue provides a structurally important replacement market as airports transition firefighting practices and equipment toward fluorine-free alternatives. Marine Vessel Firefighting also creates demand where confined spaces, fuel storage, engine rooms, cargo risks, and offshore operating conditions require robust foam performance. Future market opportunities will increasingly favor suppliers capable of providing application-specific concentrates together with system assessment, conversion guidance, operator training, and technical validation.

Regional Insights

Europe is one of the most important transition markets for Fluorine-Free Firefighting Foam Concentrates because the regulatory framework is now moving firefighting foam users toward phased replacement of PFAS-containing products. The European Commission adopted restrictions covering PFAS in firefighting foams in October 2025, with transition periods designed for different sectors. This regulatory structure is expected to sustain demand across industrial fire protection, petrochemical facilities, terminals, airports, municipal firefighting, and other professional applications. European customers are also likely to place relatively high importance on environmental documentation, certification, system compatibility, and lifecycle management, supporting suppliers with established technical and compliance capabilities.

North America is another major transition market, particularly in aviation, military-related infrastructure, petrochemical operations, and industrial fire protection. The FAA has established a transition framework for fluorine-free foam in aircraft firefighting, supporting broader qualification and operational adoption. Asia-Pacific offers a different growth profile. Large petrochemical, refining, terminal, port, shipbuilding, aviation, and industrial bases create substantial underlying firefighting-foam demand, while replacement timing and regulatory requirements differ by country. China provides opportunities through industrial fire protection upgrades and domestic formulation development, while Japan combines established fire-safety standards with demand from industrial, marine, aviation, and emergency-response markets. Regional competition is therefore likely to remain differentiated, with environmental regulation leading replacement in Europe and North America and infrastructure expansion,

localization, and progressive substitution supporting opportunities across Asia-Pacific.

Competitive Landscape Analysis

The competitive landscape for Fluorine-Free Firefighting Foam Concentrates combines established international fire-protection groups, specialist foam manufacturers, regional formulators, and integrated fire-equipment suppliers. Johnson Controls (ANSUL), Perimeter Solutions (SOLBERG), Angus Fire, National Foam, Dafo Fomtec, Viking Group, Dr. Richard Sthamer, BIOEX, NAFFCO, and HD Fire Protect represent participants with established positions across professional fire protection, industrial applications, or specialty foam technologies. Competition among these companies increasingly centers on demonstrated extinguishing performance, certification coverage, breadth of product portfolio, compatibility with installed equipment, global distribution, and technical assistance during foam conversion projects. Specialist suppliers such as Oil Technics (Aberdeen Foam), Foamtech Antifire, Fatsa Chemistry, KV Fire Chemicals, Delta Fire, 3F Ltd., Incendin, Firetech Equipment & Systems Pvt. Ltd., and Enforcer One (FIREBULL) provide additional competition through regional expertise, formulation specialization, or application-focused offerings. In Asia, Jiangsu Suolong Fire Science and Technology Co., Ltd., Shanghai Firetech Co., Ltd., Jiangsu Unifoam Industrial Fire Protection Co., Ltd., and Jinan Landun Fire Equipment Co., Ltd. participate in the Chinese market, while Yamato Protec Corporation, Nohmi Bosai Ltd., and Nippon Dry-Chemical Co., Ltd. provide a Japanese competitive presence. The market is not defined by a single competitive advantage: multinational suppliers benefit from installed-system relationships and broad certification capabilities, specialist foam producers compete through formulation expertise and application performance, while regional suppliers can benefit from local production, customer responsiveness, service networks, and cost structures. As fluorine-free conversion progresses, competitive differentiation is expected to shift increasingly toward verified performance under customer-specific operating conditions, transition support, system compatibility, supply security, and the ability to provide complete lifecycle solutions rather than concentrate supply alone.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the "Fluorine-Free Firefighting Foam Concentrates Industry Forecast" looks at past sales and reviews total world Fluorine-Free Firefighting Foam Concentrates sales in 2025, providing a comprehensive analysis by region and market sector of projected Fluorine-Free Firefighting Foam Concentrates sales for 2026 through 2032. With Fluorine-Free Firefighting Foam Concentrates sales broken down by region, market sector and sub-sector, this report provides a detailed

analysis in US\$ millions of the world Fluorine-Free Firefighting Foam Concentrates industry.

This Insight Report provides a comprehensive analysis of the global Fluorine-Free Firefighting Foam Concentrates landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Fluorine-Free Firefighting Foam Concentrates portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Fluorine-Free Firefighting Foam Concentrates market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Fluorine-Free Firefighting Foam Concentrates and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Fluorine-Free Firefighting Foam Concentrates.

This report presents a comprehensive overview, market shares, and growth opportunities of Fluorine-Free Firefighting Foam Concentrates market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

Synthetic Fluorine-Free Foam

Protein-Based Fluorine-Free Foam

Others

Segmentation by Fuel Compatibility:

Hydrocarbon Fluorine-Free Foam

Alcohol-Resistant Fluorine-Free Foam

Multipurpose Class A/B Fluorine-Free Foam

Segmentation by Proportioning Mixing Ratio:

Low Concentration (<1.0%)

Standard Concentration (1.0%–3.0%)

High Concentration (>3.0%)

Segmentation by Application:

Petrochemical Plant Fire Suppression

Oil & Gas Terminal Fire Protection

Aviation Airport Crash Rescue

Marine Vessel Firefighting

Others

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analysing the company's coverage, product portfolio, its market penetration.

Johnson Controls (ANSUL)

Perimeter Solutions (SOLBERG)

Angus Fire

National Foam

Dafo Fomtec

Viking Group

Dr. Richard Sthamer

BIOEX

NAFFCO

HD Fire Protect

Jiangsu Suolong Fire Science and Technology Co., Ltd.

Oil Technics (Aberdeen Foam)

Foamtech Antifire

Fatsa Chemistry

KV Fire Chemicals

Delta Fire

3F Ltd.

Incendin

Firetech Equipment & Systems Pvt. Ltd.

Enforcer One (FIREBULL)

Yamato Protec Corporation

Nohmi Bosai Ltd.

Nippon Dry-Chemical Co., Ltd.

Shanghai Firetech Co., Ltd.

Jiangsu Unifoam Industrial Fire Protection Co., Ltd.

Jinan Landun Fire Equipment Co., Ltd.

Key Questions Addressed in this Report

What is the 10-year outlook for the global Fluorine-Free Firefighting Foam Concentrates market?

What factors are driving Fluorine-Free Firefighting Foam Concentrates market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Fluorine-Free Firefighting Foam Concentrates market opportunities vary by end market size?

How does Fluorine-Free Firefighting Foam Concentrates break out by Type, by Application?

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview

- 2.1.1 Global Fluorine-Free Firefighting Foam Concentrates Annual Sales 2021-2032
- 2.1.2 World Current & Future Analysis for Fluorine-Free Firefighting Foam Concentrates by Geographic Region, 2021, 2025 & 2032
- 2.1.3 World Current & Future Analysis for Fluorine-Free Firefighting Foam Concentrates by Country/Region, 2021, 2025 & 2032

2.2 Fluorine-Free Firefighting Foam Concentrates Segment by Type

- 2.2.1 Synthetic Fluorine-Free Foam
- 2.2.2 Protein-Based Fluorine-Free Foam
- 2.2.3 Others
- 2.2.4 Fluorine-Free Firefighting Foam Concentrates Sales by Type
 - 2.2.4.1 Global Fluorine-Free Firefighting Foam Concentrates Sales Market Share by Type (2021-2026)
 - 2.2.4.2 Global Fluorine-Free Firefighting Foam Concentrates Revenue and Market Share by Type (2021-2026)
 - 2.2.4.3 Global Fluorine-Free Firefighting Foam Concentrates Sale Price by Type (2021-2026)

2.3 Fluorine-Free Firefighting Foam Concentrates Segment by Fuel Compatibility

- 2.3.1 Hydrocarbon Fluorine-Free Foam
- 2.3.2 Alcohol-Resistant Fluorine-Free Foam
- 2.3.3 Multipurpose Class A/B Fluorine-Free Foam
- 2.3.4 Fluorine-Free Firefighting Foam Concentrates Sales by Fuel Compatibility
 - 2.3.4.1 Global Fluorine-Free Firefighting Foam Concentrates Sales Market Share by Fuel Compatibility (2021-2026)

2.3.4.2 Global Fluorine-Free Firefighting Foam Concentrates Revenue and Market Share by Fuel Compatibility (2021-2026)

2.3.4.3 Global Fluorine-Free Firefighting Foam Concentrates Sale Price by Fuel Compatibility (2021-2026)

2.4 Fluorine-Free Firefighting Foam Concentrates Segment by Proportioning Mixing Ratio

2.4.1 Low Concentration (<1.0%)

2.4.2 Standard Concentration (1.0%–3.0%)

2.4.3 High Concentration (>3.0%)

2.4.4 Fluorine-Free Firefighting Foam Concentrates Sales by Proportioning Mixing Ratio

2.4.4.1 Global Fluorine-Free Firefighting Foam Concentrates Sales Market Share by Proportioning Mixing Ratio (2021-2026)

2.4.4.2 Global Fluorine-Free Firefighting Foam Concentrates Revenue and Market Share by Proportioning Mixing Ratio (2021-2026)

2.4.4.3 Global Fluorine-Free Firefighting Foam Concentrates Sale Price by Proportioning Mixing Ratio (2021-2026)

2.5 Fluorine-Free Firefighting Foam Concentrates Segment by Application

2.5.1 Petrochemical Plant Fire Suppression

2.5.2 Oil & Gas Terminal Fire Protection

2.5.3 Aviation Airport Crash Rescue

2.5.4 Marine Vessel Firefighting

2.5.5 Others

2.5.6 Fluorine-Free Firefighting Foam Concentrates Sales by Application

2.5.6.1 Global Fluorine-Free Firefighting Foam Concentrates Sale Market Share by Application (2021-2026)

2.5.6.2 Global Fluorine-Free Firefighting Foam Concentrates Revenue and Market Share by Application (2021-2026)

2.5.6.3 Global Fluorine-Free Firefighting Foam Concentrates Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Fluorine-Free Firefighting Foam Concentrates Breakdown Data by Company

3.1.1 Global Fluorine-Free Firefighting Foam Concentrates Annual Sales by Company (2021-2026)

3.1.2 Global Fluorine-Free Firefighting Foam Concentrates Sales Market Share by Company (2021-2026)

3.2 Global Fluorine-Free Firefighting Foam Concentrates Annual Revenue by Company

(2021-2026)

3.2.1 Global Fluorine-Free Firefighting Foam Concentrates Revenue by Company

(2021-2026)

3.2.2 Global Fluorine-Free Firefighting Foam Concentrates Revenue Market Share by Company (2021-2026)

3.3 Global Fluorine-Free Firefighting Foam Concentrates Sale Price by Company

3.4 Key Manufacturers Fluorine-Free Firefighting Foam Concentrates Producing Area Distribution, Sales Area, Product Type

3.4.1 Key Manufacturers Fluorine-Free Firefighting Foam Concentrates Product Location Distribution

3.4.2 Players Fluorine-Free Firefighting Foam Concentrates Products Offered

3.5 Market Concentration Rate Analysis

3.5.1 Competition Landscape Analysis

3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.6 New Products and Potential Entrants

3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR FLUORINE-FREE FIREFIGHTING FOAM CONCENTRATES BY GEOGRAPHIC REGION

4.1 World Historic Fluorine-Free Firefighting Foam Concentrates Market Size by Geographic Region (2021-2026)

4.1.1 Global Fluorine-Free Firefighting Foam Concentrates Annual Sales by Geographic Region (2021-2026)

4.1.2 Global Fluorine-Free Firefighting Foam Concentrates Annual Revenue by Geographic Region (2021-2026)

4.2 World Historic Fluorine-Free Firefighting Foam Concentrates Market Size by Country/Region (2021-2026)

4.2.1 Global Fluorine-Free Firefighting Foam Concentrates Annual Sales by Country/Region (2021-2026)

4.2.2 Global Fluorine-Free Firefighting Foam Concentrates Annual Revenue by Country/Region (2021-2026)

13.10.2 HD Fire Protect Fluorine-Free Firefighting Foam Concentrates Product Portfolios and Specifications

13.10.3 HD Fire Protect Fluorine-Free Firefighting Foam Concentrates Sales, Revenue, Price and Gross Margin (2021-2026)

13.10.4 HD Fire Protect Main Business Overview

13.10.5 HD Fire Protect Latest Developments

13.11 Jiangsu Suolong Fire Science and Technology Co., Ltd.

13.11.1 Jiangsu Suolong Fire Science and Technology Co., Ltd. Company Information

13.11.2 Jiangsu Suolong Fire Science and Technology Co., Ltd. Fluorine-Free Firefighting Foam Concentrates Product Portfolios and Specifications

13.11.3 Jiangsu Suolong Fire Science and Technology Co., Ltd. Fluorine-Free Firefighting Foam Concentrates Sales, Revenue, Price and Gross Margin (2021-2026)

13.11.4 Jiangsu Suolong Fire Science and Technology Co., Ltd. Main Business Overview

13.11.5 Jiangsu Suolong Fire Science and Technology Co., Ltd. Latest Developments

13.12 Oil Technics (Aberdeen Foam)

13.12.1 Oil Technics (Aberdeen Foam) Company Information

13.12.2 Oil Technics (Aberdeen Foam) Fluorine-Free Firefighting Foam Concentrates Product Portfolios and Specifications

13.12.3 Oil Technics (Aberdeen Foam) Fluorine-Free Firefighting Foam Concentrates Sales, Revenue, Price and Gross Margin (2021-2026)

13.12.4 Oil Technics (Aberdeen Foam) Main Business Overview

13.12.5 Oil Technics (Aberdeen Foam) Latest Developments

13.13 Foamtech Antifire

13.13.1 Foamtech Antifire Company Information

13.13.2 Foamtech Antifire Fluorine-Free Firefighting Foam Concentrates Product Portfolios and Specifications

13.13.3 Foamtech Antifire Fluorine-Free Firefighting Foam Concentrates Sales, Revenue, Price and Gross Margin (2021-2026)

13.13.4 Foamtech Antifire Main Business Overview

13.13.5 Foamtech Antifire Latest Developments

13.14 Fatsa Chemistry

13.14.1 Fatsa Chemistry Company Information

13.14.2 Fatsa Chemistry Fluorine-Free Firefighting Foam Concentrates Product Portfolios and Specifications

13.14.3 Fatsa Chemistry Fluorine-Free Firefighting Foam Concentrates Sales, Revenue, Price and Gross Margin (2021-2026)

13.14.4 Fatsa Chemistry Main Business Overview

13.14.5 Fatsa Chemistry Latest Developments

13.15 KV Fire Chemicals

13.15.1 KV Fire Chemicals Company Information

13.15.2 KV Fire Chemicals Fluorine-Free Firefighting Foam Concentrates Product Portfolios and Specifications

13.15.3 KV Fire Chemicals Fluorine-Free Firefighting Foam Concentrates Sales, Revenue, Price and Gross Margin (2021-2026)

13.15.4 KV Fire Chemicals Main Business Overview

13.15.5 KV Fire Chemicals Latest Developments

13.16 Delta Fire

13.16.1 Delta Fire Company Information

13.16.2 Delta Fire Fluorine-Free Firefighting Foam Concentrates Product Portfolios and Specifications

13.16.3 Delta Fire Fluorine-Free Firefighting Foam Concentrates Sales, Revenue, Price and Gross Margin (2021-2026)

13.16.4 Delta Fire Main Business Overview

- 13.16.5 Delta Fire Latest Developments
