Fluororubber sheet is a sheet material made of fluororubber. Fluororubber is an elastic material made by polymerizing fluorinated hydrocarbon monomers. Its main components are fluorinated hydrocarbon monomers, such as vinyl fluoride and chlorotrifluoroethylene. Fluororubber sheet is a sheet material with a specific shape and size made by using this fluororubber through specific processing techniques, such as molding and extrusion. Fluororubber sheet has excellent chemical resistance and can resist corrosion from a variety of acids, alkalis, salts and other chemical substances. Fluororubber is a self-reinforcing rubber with high tensile strength and tear strength.
