Abstracts

The global Fluoropolymer-Lined Globe Valve market size is predicted to grow from US$ 87.09 million in 2025 to US$ 122 million in 2032; it is expected to grow at a CAGR of 5.2% from 2026 to 2032.

A Fluoropolymer-Lined Globe Valve is a corrosion-resistant linear-motion valve in which the internal wetted surfaces of the valve body, disc/plug, seat, and other components exposed to the process medium are lined or encapsulated with fluoropolymers such as PTFE (Polytetrafluoroethylene), PFA (Perfluoroalkoxy Polymer), or FEP (Fluorinated Ethylene Propylene). The valve operates through the linear movement of a stem-driven disc or plug toward or away from the seating surface, enabling flow shut-off, isolation, throttling, or regulation. The metallic valve body provides the required mechanical and pressure-bearing strength, while the fluoropolymer lining isolates highly corrosive process media from the metallic substrate, thereby improving corrosion resistance and extending service life. In 2025, global Fluoropolymer-Lined Globe Valve production reached approximately 190.28 K Units. Key upstream raw materials for fluorine-lined globe valves include: fluoropolymers such as PTFE, PFA, and FEP (the most critical functional materials); valve body castings (ductile iron, cast steel, and stainless steel); stainless steel and corrosion-resistant alloys (for valve stems, plugs, and specialized internal components); and PTFE packing, gaskets, and sealing materials.

The global Fluoropolymer-Lined Globe Valve market is a specialized corrosion-resistant segment of the industrial valve industry. The market scope can include conventional manual, pneumatic and electric lined globe valves, as well as Fluoropolymer-Lined Globe Control Valves specifically designed for continuous flow regulation. These valves typically use carbon steel, ductile iron or stainless steel as the pressure-bearing body, while wetted flow passages, plugs/discs and other critical components are lined or

encapsulated with fluoropolymers such as PTFE, PFA, FEP and ETFE to isolate highly corrosive media from the metallic substrate. Conventional lined globe valves are primarily used for reliable shut-off and isolation, whereas lined globe control valves employ specially designed plugs, seats, actuators and positioners for continuous process control. Major applications include chlor-alkali, basic chemicals, fine chemicals, fluorochemicals, agrochemicals, pharmaceuticals, petrochemicals, new-energy materials, hydrometallurgy, and electronic and semiconductor chemicals.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Fluoropolymer-Lined Globe Valve Industry Forecast” looks at past sales and reviews total world Fluoropolymer-Lined Globe Valve sales in 2025, providing a comprehensive analysis by region and market sector of projected Fluoropolymer-Lined Globe Valve sales for 2026 through 2032. With Fluoropolymer-Lined Globe Valve sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Fluoropolymer-Lined Globe Valve industry.

This Insight Report provides a comprehensive analysis of the global Fluoropolymer-Lined Globe Valve landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Fluoropolymer-Lined Globe Valve portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Fluoropolymer-Lined Globe Valve market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Fluoropolymer-Lined Globe Valve and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Fluoropolymer-Lined Globe Valve.

This report presents a comprehensive overview, market shares, and growth opportunities of Fluoropolymer-Lined Globe Valve market by product type, application, key manufacturers and key regions and countries.
