The global Flux-Cored Welding Wire Production Line market size is predicted to grow from US\$ 1997 million in 2025 to US\$ 2769 million in 2031; it is expected to grow at a CAGR of 5.6% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

The flux-cored welding wire production line is an automated production equipment that integrates steel strip forming, flux filling, drawing and sealing processes. It is widely used in the manufacture of welding materials in the fields of automobiles, ships, steel structures, etc. by rolling the metal strip into a tube and injecting special flux (such as alloy powder, protective material) before drawing it into shape.

In 2024, the global flux-cored welding wire production line market size (including materials and equipment) will be approximately US\$1.93 billion (approximately RMB 13.924 billion), mainly driven by the lightweighting of new energy vehicles, the large-scale wind power equipment and the automation upgrading of the manufacturing industry. As the world's largest consumer market, China accounts for more than 20%, and the compound growth rate is expected to remain at 4%-6% in the next three years.
