The global Flyaway Satellite Terminal market size is predicted to grow from US\$ 1314 million in 2025 to US\$ 3038 million in 2032; it is expected to grow at a CAGR of 13.0% from 2026 to 2032.

The flyaway satellite terminal is a small mobile communication system that integrates satellite communication equipment. It can be quickly deployed in any environment to provide users with instant satellite communication services. It is small in size, light in weight, and easy to carry. Users can operate it anytime and anywhere without being restricted by geographical location. Its advantage is that even in remote areas or when natural disasters cause the interruption of conventional communication networks, the portable satellite station can still ensure the stability and reliability of communication, provide effective communication support for rescue operations, remote expeditions, and outdoor operations, and ensure real-time transmission of information and timely response to emergencies.

United States market for Flyaway Satellite Terminal is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Flyaway Satellite Terminal is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
