Abstracts

The global Foam Surfboard market size is predicted to grow from US\$ 303 million in 2025 to US\$ 427 million in 2032; it is expected to grow at a CAGR of 5.0% from 2026 to 2032.

In 2025, the global production of foam surfboards reached 1.1481 million units, with an average selling price of US\$270 per board.

Foam surfboards are finished surfboards made primarily of foam or polymer materials such as EPS, EVA, IXPE, XPE, and HDPE, using methods such as hot-pressing, molding, vacuum bagging, epoxy bonding, or multi-layer sandwich structures. Foam surfboards focus on those with soft surfaces, high buoyancy, strong impact resistance, and high safety. Main product types include beginner longboards, soft-top funboards, soft-top fishboards, soft-top shortboards, children's surfboards, surf school teaching boards, durable rental boards, and some high-performance soft-top boards.

From a product development perspective, foam surfboards are undergoing a structural upgrade from low-priced hot-pressed boards to more durable, lightweight, controllable, and environmentally friendly designs. Traditional low-end products primarily use EPS cores, wood stringers, EVA or IXPE top layers, and HDPE bottoms, emphasizing cost and safety. Mid-to-high-end products enhance maneuverability through epoxy composites, vacuum bags, hard bottoms and soft tops, reinforced stringers, detachable high-performance fin systems, and more refined board designs. Some brands are beginning to emphasize recyclable foam, bio-based resins, low-toxicity materials, and longer lifespans to address environmental pressures in water sports equipment. Future product competition will no longer be solely about price, but will focus on durability, resilience, weight, environmentally friendly materials, board design, and channel efficiency.

In terms of production capacity, the industry exhibits characteristics of 'high technological barriers and brand concentration.' Major global production capacity is concentrated in North America, Europe, and East Asia, with a single production line annual capacity of approximately 47,000-49,000 units. The industry average capacity utilization rate is approximately 84%, and the gross profit margin reaches 23.7%.

LP Information, Inc. (LPI) ' newest research report, the 'Foam Surfboard Industry Forecast' looks at past sales and reviews total world Foam Surfboard sales in 2025, providing a comprehensive analysis by region and market sector of projected Foam Surfboard sales for 2026 through 2032. With Foam Surfboard sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Foam Surfboard industry.

This Insight Report provides a comprehensive analysis of the global Foam Surfboard landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Foam Surfboard portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Foam Surfboard market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Foam Surfboard and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Foam Surfboard.

This report presents a comprehensive overview, market shares, and growth opportunities of Foam Surfboard market by product type, application, key manufacturers and key regions and countries.

Segmentation by Type:

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

- 2.1 World Market Overview
 - 2.1.1 Global Foam Surfboard Annual Sales 2021-2032
 - 2.1.2 World Current & Future Analysis for Foam Surfboard by Geographic Region, 2021, 2025 & 2032
 - 2.1.3 World Current & Future Analysis for Foam Surfboard by Country/Region, 2021, 2025 & 2032
- 2.2 Foam Surfboard Segment by Type
 - 2.2.1
