## Abstracts

The global Foldable Logistics Pallet Box market size is predicted to grow from US\$ 1213 million in 2025 to US\$ 1738 million in 2032; it is expected to grow at a CAGR of 5.2% from 2026 to 2032.

In 2025, global production of foldable logistics pallet boxes reached 9.12 million units, with an average selling price of US\$136 per unit. A foldable logistics pallet box is a modular, foldable, and reusable transport packaging container constructed by stacking pallets, a box body (pallets), and a lid. Its core design utilizes one or more pallet sections to form an adjustable-height enclosed space. The pallets are typically composed of four or six panels connected by special hinges with hinge feet, allowing for quick assembly and disassembly. They can be folded and compressed for empty transport or storage, significantly improving transport efficiency. Applications include automotive parts manufacturing, food processing and cold chain logistics, post-harvest agricultural logistics, packaging and industrial turnover, retail distribution, and waste and recycling logistics. The upstream of the industry chain mainly consists of HDPE/PP resin, recycled plastics, structural core/honeycomb panel materials, injection molding/double-sheet thermoforming/blow molding molds, and accessories such as buckles/tags/RFID; the midstream is the manufacturers of palletized crates; and the downstream includes automotive OEMs and Tier supply chains, food and agricultural product processors, 3PLs/warehousing and logistics providers, retail distribution centers, and chemical and recycling companies. Gross profit margins range from approximately 20% to 45%.
