The global Folding Washing Machine market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

A folding washing machine, also known as a portable washing machine or a collapsible washing machine, is a compact and lightweight device designed for washing clothes. Unlike traditional, full-sized washing machines, folding washing machines are typically small and can be folded or collapsed when not in use, making them highly portable and space-saving. These machines are designed for individuals or households with limited space or those who need a washing solution while traveling or camping.

The trend toward smaller living spaces, such as apartments, condos, and tiny homes, was driving the demand for space-saving appliances, including folding washing machines.
