The global Follicle Stimulating Hormone (FSH) Injections market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Follicle Stimulating Hormone (FSH) injections are pharmaceutical preparations containing the hormone FSH, a crucial component in the regulation of reproductive processes. FSH is produced by the pituitary gland and plays a key role in the stimulation of ovarian follicles in females and sperm production in males. FSH injections are commonly used in assisted reproductive technologies, such as in vitro fertilization (IVF), to enhance the development and maturation of multiple follicles in the ovaries. In fertility treatments, these injections help regulate and stimulate the ovaries to produce more eggs, increasing the chances of successful fertilization and pregnancy.

Human follicle stimulating hormone (FSH) includes urinary human follicle stimulating hormone (uFSH) and recombinant FSH (rFSH). According to expert consensus, recombinant follicle-stimulating hormone is available in two dosage forms: powder injection and water injection.

The fertility preservation and infertility treatment market has witnessed significant growth in recent years, driven by factors such as increasing infertility rates, delayed pregnancies, advancements in assisted reproductive technologies (ART), and growing awareness. Fertility preservation technologies, including egg freezing and sperm banking, have gained popularity among individuals seeking to preserve their reproductive potential. In the infertility treatment segment, in vitro fertilization (IVF), intrauterine insemination (IUI), and other ART procedures have become mainstream options. Future developments are anticipated in areas such as personalized medicine,

gene editing technologies, and improved success rates in ART procedures. The market is likely to see ongoing advancements, innovations, and collaborations aimed at addressing infertility challenges and expanding the range of options available to individuals and couples.
