Ink Follower is a special sealing material that presents a gel-like substance and exists as an 'ink plug' at the ink rear end of writing tools such as gel pens. Ink Follower can effectively prevent ink from leaking from the rear end of the pen tube, ensuring smoothness and safety of writing. It can reduce the impact of external shocks on ink, so that the gel pen will not leak ink when it is placed upright, lying down or dropped on the ground. The follow-up sealant can also effectively prevent the evaporation of water in the ink, maintaining the stability and durability of the ink. The follow-up sealant is widely used in writing tools such as gel pens, and is an important component to ensure smooth writing and prevent ink leakage.

The global Follow-up Sealant market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
