Food grade ammonium ferric citrate is a composite salt synthesized from citric acid, iron salt and ammonium salt. It usually exists in the form of brown or green flakes or powder and is hygroscopic. Food grade ammonium ferric citrate is used in food supplements and nutritional products. As an iron fortifier, it can effectively supplement the iron required by the human body and prevent iron deficiency anemia. Compared with inorganic iron, its absorption rate is higher and it has less effect on the color of food.
