## Abstracts

The global Food Grade Monoammonium Glycyrrhizinate market size is predicted to grow from US\$ 29.77 million in 2025 to US\$ 44.29 million in 2032; it is expected to grow at a CAGR of 6.0% from 2026 to 2032.

Food Grade Monoammonium Glycyrrhizinate (MAG) is a purified compound extracted from the roots of the licorice plant (*Glycyrrhiza glabra*), presented as a white crystalline powder with a sweet taste and no odor. Its molecular formula is  $C_{27}H_{34}NO_{16}$ , and it has a molecular weight of 839.96 g/mol. MAG is widely used in the food industry as a natural sweetener and flavor enhancer, offering a sweetness approximately 50 times that of sucrose. Its high sweetness and low-calorie properties make it suitable for low-sugar or zero-sugar products, such as beverages, candies, and chewing gum. Additionally, MAG can improve the taste and mouthfeel balance of foods, especially when combined with other sweeteners, providing a better taste experience.

Monoammonium Glycyrrhizinate is included in dairy products, confections, baked goods, and beverages where sweetness or flavor enhancement is desired. It is an excellent addition to sauces such as gravy, BBQ, soy, beverages, chocolate puddings, ice cream, candies, etc. It is also used to flavor tobacco for expensive cigarettes.

Monoammonium Glycyrrhizinate is sometimes used as a sweetener and flavor enhancer in the food and beverage industry. The trend of seeking natural and plant-derived ingredients in food products may contribute to increased demand.

The health-conscious consumer trend has led to a growing market for products with perceived health benefits. Monoammonium Glycyrrhizinate, derived from licorice root, is sometimes associated with potential health properties, contributing to its inclusion in

health and wellness products.

Food Grade Monoammonium Glycyrrhizinate is a versatile compound with significant applications across multiple industries. Its natural origin and therapeutic properties make it a valuable ingredient in food products, pharmaceuticals, and cosmetics. The global market is poised for continued growth, driven by increasing consumer demand for natural and effective ingredients. As technological advancements continue to address existing challenges, the MAG market is expected to witness sustained growth and innovation in the coming years.
