## Abstracts

The global Food-Grade Resveratrol market size is predicted to grow from US\$ 55.76 million in 2025 to US\$ 116 million in 2032; it is expected to grow at a CAGR of 11.2% from 2026 to 2032.

Food-grade resveratrol refers to trans-resveratrol (the active ingredient) produced through natural plant extraction, chemical synthesis, or bio-fermentation processes, meeting Chinese national food safety standards and related regulations. It is used in general food and health food products, meeting core compliance requirements across the entire supply chain, including purity, safety, and testing indicators. This distinguishes it from pharmaceutical/cosmetic-grade resveratrol, which has higher standards and more limited application scenarios.

Food-grade resveratrol typically has a purity of over 98%, with total impurities  $\leq 2.0\%$ . It is a white to off-white crystalline powder, readily soluble in ethanol and acetone, and slightly soluble in water.

Upstream raw materials for food-grade resveratrol include *Polygonum cuspidatum* (highest content, mainly in Southwest China), grape pomace, peanuts, mulberries, cranberries, 3,5-dihydroxybenzaldehyde, p-hydroxystyrene, malonate, recombinant engineered bacteria (*Saccharomyces cerevisiae*, *Escherichia coli*), glucose, and yeast extract. Midstream production processes include plant extraction, chemical synthesis, and bio-fermentation. The core downstream application involves integrating food-grade resveratrol into end products and reaching consumers through distribution channels. This is the value realization link in the industry chain, and downstream applications are highly dependent on regulations and market demand.

In 2025, global sales of food-grade resveratrol reached 380 tons, with a production capacity of approximately 600 tons, an average selling price of \$150/kg, and an average gross profit margin of 42%-50%.

United States market for Food-Grade Resveratrol is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
