Food-grade silicone molds are additive silicone molds. They are high-quality transparent food silicone with high transparency and stability. They can withstand high temperatures up to 250°C and will not restore when heated in a sealed environment. Food-grade silica gel is made of high-quality silica gel (newly imported food-grade silica gel raw material) and processed through scientific formula and advanced technology. It has the characteristics of softness, high temperature resistance and stable performance. Food-grade silicone molds are mainly used for food replica molds, vegetarian molds, sea cucumber molds, mousse cake molds, ice bears, etc. as well as food-grade cake molds made of carbon fiber composite materials, craft ceramics, printing, household appliances, lighting products, etc.
