Food-grade starch glucose syrup is a liquid sweetener made from starch through hydrolysis. It is mainly composed of glucose (glucose base) and has a transparent or slightly yellow liquid form with a weak sweetness. Starch glucose syrup is obtained by enzymatic hydrolysis of starch, usually through the action of glucose enzyme, which hydrolyzes starch into glucose. This syrup is mainly used as a sweetener and functional additive in the food industry and is widely used in food manufacturing such as baked goods, candy, ice cream, and beverages. Food grade starch glucose syrup has many uses, such as sweetness regulator, humectant, saccharifying agent, anti-crystallization agent and thickening agent. It can provide sweetness, increase taste, extend shelf life and other functions in food processing, and is a common food additive.
