## Abstracts

The global Food Grade Yeast Extracts and Beta-Glucan market size is predicted to grow from US\$ 792 million in 2025 to US\$ 1356 million in 2032; it is expected to grow at a CAGR of 8.1% from 2026 to 2032.

Glucan is a special form of soluble dietary fiber. - Glucans are derived from bacteria, fungi, yeast and grains. Yeast extract is a food flavor produced from the same yeast used to make bread and beer.

Increasing consumption of processed foods, dynamic changes in dietary patterns, and increasing disposable income are expected to drive the growth of the yeast extract and beta-glucan market over the forecast period. Moreover, the demand for ready-to-eat and ready-to-eat foods containing yeast extract and  $\beta$ -glucan is increasing to enhance the nutritional content of food. Yeast extract is used as a flavoring agent in the food and beverage industry. Yeast extract and beta-glucan are mainly used in the production of probiotics and nutritional dietary supplements because they are natural catalysts. Rising health-conscious population, rising obesity and related problems such as diabetes and hypertension drive the demand for beta-glucan over the forecast period. In some clinical trials, beta-glucan has acquired significant anti-cancer, anti-diabetic and anti-hypercholesterolemic (controlling cholesterol levels) properties.
