The global Food Storage Containers market size is predicted to grow from US\$ 175220 million in 2025 to US\$ 218200 million in 2031; it is expected to grow at a CAGR of 3.7% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

A food storage container is a container for the convenience of people to store and carry food, usually divided into plastic food containers, metal food containers, glass food containers and cardboard food containers, etc.

The round food storage containers segment accounted for the maximum market share and will continue to dominate the market for the next few years. One of the major factors responsible for the growing preference for round containers among end-users is its benefit of storing dry ingredients as they do not leave any space for the food to get stuck.
