A foot peel or mask is a skincare treatment designed to exfoliate and remove dead skin cells from the feet. Typically, it comes in the form of a boot-like mask that is applied to the feet for a set period of time, often ranging from 30 minutes to an hour. These masks are infused with natural exfoliants such as fruit acids or enzymes that work to dissolve dead skin, leaving the feet feeling soft and rejuvenated. After the treatment, the dead skin begins to shed naturally over a period of several days, revealing smoother and more supple skin underneath. Foot peels are often used to treat dry, rough skin, calluses, and cracked heels, providing a spa-like experience at home.
