Form-fill-seal machines are machines that form the package, fill it with a wet or dry product and seal it closed. Most FFS systems use flexible film to form the primary package, such as a bag or pouch. But gable-top and aseptic cartons are also created in a form-fill-seal operation. And most blister packs are produced with a thermoform/fill/seal machine, a close cousin. Form fill and sealing equipment are used in the packaging of F&B, pharmaceuticals, chemicals, and consumer products. Each FFS machine forms the packaging material from a roll or a stack. Then the formed packaging material is filled and sealed.

The major players in global Form Fill and Sealing (FFS) Equipment market include Bocsh, Wihuri Group, Premier Tech Chronos, etc., and the market concentration rate is low. North America and Europe are main markets, they occupy about 50% of the global market. Vertical Form Fill Sealing (Vffs) is the main type, with a share about 70%. Food is the main application, which holds a share about 80%.
