Formaldehyde cyanohydrin, also known as glycolonitrile or hydroxyacetonitrile, is an organic compound with the chemical formula HOCH_2CN . It is the simplest cyanohydrin, derived from formaldehyde. This compound appears as a colorless liquid and is soluble in both water and ether. Although it has specific applications in chemical synthesis and industrial processes, glycolonitrile is chemically unstable and readily decomposes into toxic substances such as formaldehyde and hydrogen cyanide. As a result, it is classified as an extremely hazardous substance, requiring strict handling and storage precautions to ensure safety.
