Abstracts

The global Four-wire Stone Extraction Baskets market size is predicted to grow from US\$ 187 million in 2025 to US\$ 245 million in 2032; it is expected to grow at a CAGR of 4.0% from 2026 to 2032.

Four-wire Stone Extraction Baskets are specialized interventional medical devices widely used in urology and gastroenterology for the minimally invasive removal of urinary (kidney, ureteral) or biliary tract stones. Composed of four high-elasticity metal wires (typically nitinol, a shape-memory alloy) braided into a collapsible basket-like structure, the device is integrated with a slender, biocompatible catheter and an ergonomic extracorporeal handle. During procedures (e.g., ureteroscopy, cholangioscopy), the basket is collapsed and delivered through the working channel of an endoscope to the stone site; the clinician then manipulates the handle to expand the four wires radially, securely encapsulating stones of varying sizes (from small fragments to larger calculi) while minimizing trauma to mucosal tissues. The 4-wire configuration balances optimal stone retention force, maneuverability, and atraumatic performance—its symmetric design ensures uniform expansion and stable grasping, making it the gold standard for routine stone extraction in clinical practice due to versatility across anatomical sites and stone characteristics.

Key Findings

Four-wire basket architecture remains an established configuration for controlled endoscopic stone capture and extraction

Nitinol and Stainless Steel constitute the two material categories covered by the Four-wire Stone Extraction Baskets market

Urology represents a core application area while Biliary Surgery provides an additional important procedural demand base

Product competition increasingly focuses on small sheath profiles flexibility basket stability controlled deployment and compatibility with modern endoscopes

Market Trends

The development direction of Four-wire Stone Extraction Baskets is increasingly centered on improving procedural control while reducing the profile and mechanical burden of the retrieval device. In urological procedures, flexible ureteroscopy is encouraging thinner sheaths, higher basket flexibility, improved endoscope deflection and better irrigation flow, while tipless and controllable cage designs are intended to improve access to stones located in difficult anatomical positions. Nitinol is particularly suited to this trend because shape recovery allows the four-wire cage to maintain functional geometry after repeated deformation, while Stainless Steel continues to provide a relevant option where wire rigidity, radial strength and stable basket form are important. Product innovation is also shifting from the basket alone toward interaction with the entire endoscopic workflow, including compatibility with laser lithotripsy, precise basket rotation, adjustable cage opening and controlled stone release. Existing commercial portfolios demonstrate the movement toward smaller sheath sizes and more controllable four-wire cage structures.

Market Dynamics

Drivers

Demand for Four-wire Stone Extraction Baskets is supported by the continued adoption of minimally invasive endoscopic procedures for urinary and biliary stone management. Increasing utilization of ureteroscopy, flexible endoscopy and endoscopic biliary intervention creates recurring demand for disposable retrieval devices capable of securely capturing stones or fragments after lithotripsy. Improvements in endoscope imaging, scope flexibility and intracorporeal lithotripsy also increase the importance of retrieval baskets capable of operating through relatively small working channels without significantly restricting visualization, irrigation or scope movement. From a clinical workflow perspective, reliable deployment, basket shape retention and controlled retrieval can improve procedural efficiency and reduce the need for repeated device exchanges, reinforcing demand for technically optimized Four-wire Stone Extraction

Baskets.

Restraints

Market expansion is constrained by procedural cost sensitivity, hospital procurement pressure and competition from alternative stone-management techniques and retrieval configurations. Four-wire Stone Extraction Baskets are generally used as procedure-specific consumables, making pricing and reimbursement conditions important to purchasing decisions, particularly in markets where centralized hospital tenders emphasize unit cost. Device performance also depends on balancing sheath diameter, wire strength, flexibility and basket opening force; reducing profile excessively may compromise mechanical robustness, whereas increasing wire or sheath dimensions can affect endoscope deflection and irrigation. In addition, some fragmented stones may be removed through aspiration, spontaneous passage or alternative retrieval devices, limiting basket utilization in selected procedures.

Opportunities

The most attractive opportunities are associated with advanced flexible endoscopy and increasingly precise stone-management procedures. Miniaturized Four-wire Stone Extraction Baskets that combine a low-profile sheath with reliable cage expansion can benefit from greater use of flexible ureteroscopy, especially for renal and ureteral stones requiring navigation through difficult anatomy. Nitinol designs offer additional potential for optimized cage geometry, shape recovery and controlled manipulation, while Stainless Steel remains relevant for applications prioritizing rigidity and retrieval force. Biliary Surgery also provides opportunities for specialized baskets adapted to bile-duct dimensions and endoscopic access requirements. Emerging-market expansion of endoscopy infrastructure and domestic medical-device manufacturing creates additional commercial potential, particularly for suppliers capable of offering consistent performance, regulatory compliance and competitive procedure-level economics.

Challenges

The central technical challenge for Four-wire Stone Extraction Baskets is achieving reliable stone capture while minimizing trauma, basket deformation and the risk of stone or basket impaction. Device manufacturers must balance wire stiffness, radial force, elasticity, cage diameter, distal geometry and sheath flexibility across a wide range of stone sizes and anatomical conditions. Basket performance must remain predictable after passing through a deflected endoscope, and the cage must open consistently once it reaches the treatment site. Compatibility with lithotripsy workflows introduces another

engineering challenge because the basket may operate close to laser fibers or other stone-fragmentation devices. Manufacturers must therefore maintain tight dimensional tolerances, stable wire properties, consistent assembly quality, sterilization reliability and regulatory documentation while simultaneously responding to hospital pressure for smaller devices and lower treatment costs.

Industry Chain Analysis

The upstream industry chain for Four-wire Stone Extraction Baskets primarily consists of medical-grade Nitinol (Nickel-Titanium Alloy) wire, Stainless Steel wire, polymer catheter and sheath materials, handle components, metal tubing, adhesives and medical-device packaging materials. Wire material is especially important because elasticity, radial strength, fatigue resistance and shape retention directly influence the opening and capture characteristics of the four-wire basket. Midstream manufacturing involves precision wire forming or cutting, basket geometry formation, joining and fixation, catheter or sheath assembly, handle integration, dimensional inspection, functional testing, cleaning, packaging and sterilization. Manufacturing value is concentrated in precision forming capability, material consistency, miniature-component assembly, process validation and quality control rather than in raw-material volume alone.

Downstream value creation occurs through hospitals, endoscopy centers and surgical facilities performing Urology, Biliary Surgery and other stone-management procedures. Clinical value is determined by how effectively the basket integrates with the endoscope, lithotripsy equipment and physician technique. Products that reduce device exchanges, preserve irrigation and endoscope deflection, provide predictable basket opening and simplify stone capture can command greater procedural value even when manufacturing material content is relatively limited. Consequently, profitability is influenced not only by material and production costs but also by regulatory approvals, product reliability, clinical adoption, hospital access, physician familiarity, distribution coverage and the breadth of the supporting endourology or endoscopy portfolio.

Segment Insights

Under the product classification, Nitinol (Nickel-Titanium Alloy) Four-wire Stone Extraction Baskets occupy an important position in procedures requiring flexibility, repeated deformation and reliable recovery of basket geometry. Nitinol is particularly compatible with flexible ureteroscopic workflows because the basket must pass through curved and highly deflected working channels while retaining sufficient opening force at

the treatment site. Current four-wire nitinol products also demonstrate continuing development toward smaller sheath profiles, controllable cage dimensions and improved endoscope compatibility.

Stainless Steel Four-wire Stone Extraction Baskets provide a complementary technical route emphasizing wire strength, structural rigidity and stable basket geometry. Their mechanical characteristics support stone grasping and manipulation where a more rigid basket structure is advantageous. Rather than representing a simple substitution relationship, Nitinol and Stainless Steel address different balances of flexibility, radial force, shape retention and procedural preference. Consequently, future product differentiation is expected to depend increasingly on the interaction between basket material, wire geometry, sheath profile, basket diameter and target procedure rather than material selection alone.

Downstream Market Opportunities

Urology is a major downstream opportunity for Four-wire Stone Extraction Baskets because stone retrieval is an integral part of many ureteroscopic and renal stone-management procedures. As lithotripsy increasingly fragments calculi into smaller pieces, physicians require retrieval devices capable of capturing residual fragments while maintaining endoscopic visibility and navigation. Biliary Surgery represents another important market where baskets are used to capture and remove calculi or debris from the biliary tract, and device selection is influenced by duct anatomy, basket size and endoscopic access. Commercial stone-extraction products are already designed specifically for both urinary and biliary indications, supporting the continued development of procedure-specific basket configurations. The Others segment provides additional opportunities in specialized endoscopic stone or foreign-body retrieval procedures where four-wire cage architecture can provide controlled capture and extraction.

Regional Insights

The regional structure of the Four-wire Stone Extraction Baskets market reflects differences in endoscopy penetration, procedure volumes, healthcare expenditure, reimbursement systems and domestic medical-device manufacturing capacity. North America and Europe represent mature endourology and endoscopy markets characterized by established minimally invasive treatment pathways, relatively high utilization of advanced ureteroscopes and strong emphasis on product reliability and procedural efficiency. These markets favor differentiated products incorporating low-

profile sheaths, advanced basket materials and ergonomic handling, while hospital procurement organizations simultaneously exert continuing pressure on disposable-device pricing.

Asia-Pacific represents an important expansion opportunity as endoscopic stone-management procedures become more widely available and regional medical-device manufacturing capabilities continue to develop. Japan has an established precision medical-device industry, while China has developed a broad domestic supplier base serving urological and gastrointestinal endoscopy. The analyst-defined competitive universe includes both international companies and a substantial group of Chinese manufacturers, indicating increasing localization of supply. Emerging regions remain more sensitive to equipment availability, physician training and procedure affordability, creating opportunities for products that combine reliable clinical performance with competitive acquisition costs.

Competitive Landscape Analysis

The Four-wire Stone Extraction Baskets market combines diversified global medical-device companies, specialized endourology and endoscopy suppliers, and increasingly active Asian manufacturers. Boston Scientific, Olympus, Cook Medical, BD, Coloplast and KARL STORZ participate with broader urology or endoscopy platforms, giving them advantages in hospital relationships, physician access, complementary procedural devices and international distribution. Richard Wolf GmbH, Medi-Globe GmbH, UROTECH GmbH and ZEON MEDICAL INC. represent specialized medical-device participants with established exposure to endoscopy or urological procedures. The competitive landscape also includes Micro-Tech (Nanjing) Co., Ltd., Vedkang Medical, Innovex Medical, Zhejiang Soudon Medical Technology Co., Ltd., Medorah Meditek Pvt Ltd, Zhejiang Yigao Medical Technology Co., Ltd., Changmei Medical, Changzhou Lookmed Medical Instrument Co., Ltd. and Shenzhen Hainwise Medical Technology Co., Ltd., strengthening competition through regional manufacturing and expanding procedural portfolios. Competition is increasingly defined by basket material and geometry, sheath miniaturization, shape retention, opening consistency, endoscope compatibility, handling precision, regulatory compliance and supply reliability rather than by a single product parameter. Suppliers with broader stone-management portfolios can additionally compete through integrated procedural solutions and channel coverage, while specialized manufacturers may differentiate through focused product development, manufacturing efficiency and localized customer support.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Four-wire Stone Extraction Baskets Industry Forecast” looks at past sales and reviews total world Four-wire Stone Extraction Baskets sales in 2025, providing a comprehensive analysis by region and market sector of projected Four-wire Stone Extraction Baskets sales for 2026 through 2032. With Four-wire Stone Extraction Baskets sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Four-wire Stone Extraction Baskets industry.

This Insight Report provides a comprehensive analysis of the global Four-wire Stone Extraction Baskets landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Four-wire Stone Extraction Baskets portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Four-wire Stone Extraction Baskets market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Four-wire Stone Extraction Baskets and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Four-wire Stone Extraction Baskets.

This report presents a comprehensive overview, market shares, and growth opportunities of Four-wire Stone Extraction Baskets market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

Nitinol (Nickel-Titanium Alloy)

Stainless Steel

Segmentation by Stone Extraction Baskets Shape:

Diamond Shape

Semi-Circular Shape

Others

Segmentation by Basket Opening Width:

Small (<10mm)

Medium (10mm-18mm)

Large (>18mm)

Segmentation by Application:

Urology

Biliary Surgery

Other

This report also splits the market by region:

Zhejiang Yigao Medical Technology Co., Ltd.

Changmei Medical

Changzhou Lookmed Medical Instrument Co., Ltd.

Shenzhen Hainwise Medical Technology Co., Ltd.

Key Questions Addressed in this Report

What is the 10-year outlook for the global Four-wire Stone Extraction Baskets market?

What factors are driving Four-wire Stone Extraction Baskets market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Four-wire Stone Extraction Baskets market opportunities vary by end market size?

How does Four-wire Stone Extraction Baskets break out by Type, by Application?

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

- 2.1 World Market Overview
 - 2.1.1 Global Four-wire Stone Extraction Baskets Annual Sales 2021-2032
 - 2.1.2 World Current & Future Analysis for Four-wire Stone Extraction Baskets by Geographic Region, 2021, 2025 & 2032
 - 2.1.3 World Current & Future Analysis for Four-wire Stone Extraction Baskets by Country/Region, 2021, 2025 & 2032
- 2.2 Four-wire Stone Extraction Baskets Segment by Type
 - 2.2.1 Nitinol (Nickel-Titanium Alloy)
 - 2.2.2 Stainless Steel
 - 2.2.3 Four-wire Stone Extraction Baskets Sales by Type
 - 2.2.3.1 Global Four-wire Stone Extraction Baskets Sales Market Share by Type (2021-2026)
 - 2.2.3.2 Global Four-wire Stone Extraction Baskets Revenue and Market Share by Type (2021-2026)
 - 2.2.3.3 Global Four-wire Stone Extraction Baskets Sale Price by Type (2021-2026)
- 2.3 Four-wire Stone Extraction Baskets Segment by Stone Extraction Baskets Shape
 - 2.3.1 Diamond Shape
 - 2.3.2 Semi-Circular Shape
 - 2.3.3 Others
 - 2.3.4 Four-wire Stone Extraction Baskets Sales by Stone Extraction Baskets Shape
 - 2.3.4.1 Global Four-wire Stone Extraction Baskets Sales Market Share by Stone Extraction Baskets Shape (2021-2026)
 - 2.3.4.2 Global Four-wire Stone Extraction Baskets Revenue and Market Share by Stone Extraction Baskets Shape (2021-2026)

2.3.4.3 Global Four-wire Stone Extraction Baskets Sale Price by Stone Extraction Baskets Shape (2021-2026)

2.4 Four-wire Stone Extraction Baskets Segment by Basket Opening Width

2.4.1 Small (<10mm)

2.4.2 Medium (10mm-18mm)

2.4.3 Large (>18mm)

2.4.4 Four-wire Stone Extraction Baskets Sales by Basket Opening Width

2.4.4.1 Global Four-wire Stone Extraction Baskets Sales Market Share by Basket Opening Width (2021-2026)

2.4.4.2 Global Four-wire Stone Extraction Baskets Revenue and Market Share by Basket Opening Width (2021-2026)

2.4.4.3 Global Four-wire Stone Extraction Baskets Sale Price by Basket Opening Width (2021-2026)

2.5 Four-wire Stone Extraction Baskets Segment by Application

2.5.1 Urology

2.5.2 Biliary Surgery

2.5.3 Other

2.5.4 Four-wire Stone Extraction Baskets Sales by Application

2.5.4.1 Global Four-wire Stone Extraction Baskets Sale Market Share by Application (2021-2026)

2.5.4.2 Global Four-wire Stone Extraction Baskets Revenue and Market Share by Application (2021-2026)

2.5.4.3 Global Four-wire Stone Extraction Baskets Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Four-wire Stone Extraction Baskets Breakdown Data by Company

3.1.1 Global Four-wire Stone Extraction Baskets Annual Sales by Company (2021-2026)

3.1.2 Global Four-wire Stone Extraction Baskets Sales Market Share by Company (2021-2026)

3.2 Global Four-wire Stone Extraction Baskets Annual Revenue by Company (2021-2026)

3.2.1 Global Four-wire Stone Extraction Baskets Revenue by Company (2021-2026)

3.2.2 Global Four-wire Stone Extraction Baskets Revenue Market Share by Company (2021-2026)

3.3 Global Four-wire Stone Extraction Baskets Sale Price by Company

3.4 Key Manufacturers Four-wire Stone Extraction Baskets Producing Area Distribution,

Sales Area, Product Type

3.4.1 Key Manufacturers Four-wire Stone Extraction Baskets Product Location

Distribution

3.4.2 Players Four-wire Stone Extraction Baskets Products Offered

3.5 Market Concentration Rate Analysis

3.5.1 Competition Landscape Analysis

3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.6 New Products and Potential Entrants

3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR FOUR-WIRE STONE EXTRACTION BASKETS BY GEOGRAPHIC REGION

4.1 World Historic Four-wire Stone Extraction Baskets Market Size by Geographic Region (2021-2026)

4.1.1 Global Four-wire Stone Extraction Baskets Annual Sales by Geographic Region (2021-2026)

4.1.2 Global Four-wire Stone Extraction Baskets Annual Revenue by Geographic Region (2021-2026)

4.2 World Historic Four-wire Stone Extraction Baskets Market Size by Country/Region (2021-2026)

4.2.1 Global Four-wire Stone Extraction Baskets Annual Sales by Country/Region (2021-2026)

4.2.2 Global Four-wire Stone Extraction Baskets Annual Revenue by Country/Region (2021-2026)

4.3 Americas Four-wire Stone Extraction Baskets Sales Growth

4.4 APAC Four-wire Stone Extraction Baskets Sales Growth

4.5 Europe Four-wire Stone Extraction Baskets Sales Growth

4.6 Middle East & Africa Four-wire Stone Extraction Baskets Sales Growth

5 AMERICAS

5.1 Americas Four-wire Stone Extraction Baskets Sales by Country

5.1.1 Americas Four-wire Stone Extraction Baskets Sales by Country (2021-2026)

5.1.2 Americas Four-wire Stone Extraction Baskets Revenue by Country (2021-2026)

5.2 Americas Four-wire Stone Extraction Baskets Sales by Type (2021-2026)

5.3 Americas Four-wire Stone Extraction Baskets Sales by Application (2021-2026)

5.4 United States

5.5 Canada

5.6 Mexico

5.7 Brazil

6.1 APAC Four-wire Stone Extraction Baskets Sales by Region

6.1.1 APAC Four-wire Stone Extraction Baskets Sales by Region (2021-2026)

6.1.2 APAC Four-wire Stone Extraction Baskets Revenue by Region (2021-2026)

6.2 APAC Four-wire Stone Extraction Baskets Sales by Type (2021-2026)

6.3 APAC Four-wire Stone Extraction Baskets Sales by Application (2021-2026)

6.4 China

6.5 Japan

6.6 South Korea

6.7 Southeast Asia

6.8 India

6.9 Australia

6.10 China Taiwan

7 EUROPE

7.1 Europe Four-wire Stone Extraction Baskets by Country

7.1.1 Europe Four-wire Stone Extraction Baskets Sales by Country (2021-2026)

7.1.2 Europe Four-wire Stone Extraction Baskets Revenue by Country (2021-2026)

7.2 Europe Four-wire Stone Extraction Baskets Sales by Type (2021-2026)

7.3 Europe Four-wire Stone Extraction Baskets Sales by Application (2021-2026)

7.4 Germany

7.5 France

7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa Four-wire Stone Extraction Baskets by Country

8.1.1 Middle East & Africa Four-wire Stone Extraction Baskets Sales by Country (2021-2026)

8.1.2 Middle East & Africa Four-wire Stone Extraction Baskets Revenue by Country (2021-2026)

8.2 Middle East & Africa Four-wire Stone Extraction Baskets Sales by Type (2021-2026)

8.3 Middle East & Africa Four-wire Stone Extraction Baskets Sales by Application (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 MANUFACTURING COST STRUCTURE ANALYSIS

10.1 Raw Material and Suppliers

10.2 Manufacturing Cost Structure Analysis of Four-wire Stone Extraction Baskets

10.3 Manufacturing Process Analysis of Four-wire Stone Extraction Baskets

10.4 Industry Chain Structure of Four-wire Stone Extraction Baskets

11 MARKETING, DISTRIBUTORS AND CUSTOMER

11.1 Sales Channel

11.1.1 Direct Channels

11.1.2 Indirect Channels

11.2 Four-wire Stone Extraction Baskets Distributors

11.3 Four-wire Stone Extraction Baskets Customer

12 WORLD FORECAST REVIEW FOR FOUR-WIRE STONE EXTRACTION BASKETS BY GEOGRAPHIC REGION

12.1 Global Four-wire Stone Extraction Baskets Market Size Forecast by Region

12.1.1 Global Four-wire Stone Extraction Baskets Forecast by Region (2027-2032)

12.1.2 Global Four-wire Stone Extraction Baskets Annual Revenue Forecast by Region (2027-2032)

12.2 Americas Forecast by Country (2027-2032)

12.3 APAC Forecast by Region (2027-2032)

12.4 Europe Forecast by Country (2027-2032)

12.5 Middle East & Africa Forecast by Country (2027-2032)

12.6 Global Four-wire Stone Extraction Baskets Forecast by Type (2027-2032)

12.7 Global Four-wire Stone Extraction Baskets Forecast by Application (2027-2032)

13 KEY PLAYERS ANALYSIS

13.1 Boston Scientific

13.1.1 Boston Scientific Company Information

13.1.2 Boston Scientific Four-wire Stone Extraction Baskets Product Portfolios and Specifications

13.1.3 Boston Scientific Four-wire Stone Extraction Baskets Sales, Revenue, Price and Gross Margin (2021-2026)

13.1.4 Boston Scientific Main Business Overview

13.1.5 Boston Scientific Latest Developments

13.2 Olympus

13.2.1 Olympus Company Information

13.2.2 Olympus Four-wire Stone Extraction Baskets Product Portfolios and Specifications

13.2.3 Olympus Four-wire Stone Extraction Baskets Sales, Revenue, Price and Gross Margin (2021-2026)

13.2.4 Olympus Main Business Overview

13.2.5 Olympus Latest Developments

13.3 Cook Medical

13.3.1 Cook Medical Company Information

13.3.2 Cook Medical Four-wire Stone Extraction Baskets Product Portfolios and Specifications

13.3.3 Cook Medical Four-wire Stone Extraction Baskets Sales, Revenue, Price and Gross Margin (2021-2026)

13.3.4 Cook Medical Main Business Overview

13.3.5 Cook Medical Latest Developments

13.4 BD

13.4.1 BD Company Information

13.4.2 BD Four-wire Stone Extraction Baskets Product Portfolios and Specifications

13.4.3 BD Four-wire Stone Extraction Baskets Sales, Revenue, Price and Gross Margin (2021-2026)

13.4.4 BD Main Business Overview

13.4.5 BD Latest Developments

13.5 Coloplast

13.5.1 Coloplast Company Information
