The global FPV Cameras market size is predicted to grow from US\$ 35.99 million in 2025 to US\$ 48.57 million in 2032; it is expected to grow at a CAGR of 4.5% from 2026 to 2032.

The FPV (First Person View) camera market is experiencing a positive trend due to several factors. One of the key drivers for the market growth is the increasing popularity of FPV drone racing and freestyle flying. FPV cameras are essential components of FPV drone systems, allowing pilots to have a real-time immersive view from the perspective of the drone. As drone racing and freestyle flying gain traction as exciting sports and hobbies, the demand for high-quality FPV cameras is on the rise. Additionally, the growing interest in aerial photography and videography is also driving the market growth. FPV cameras offer unique perspectives and allow users to capture stunning aerial shots and videos. With the increasing popularity of drones for photography and videography, the demand for FPV cameras with high-resolution capabilities, smooth video transmission, and low latency is increasing.
