A frac gun perforating system, also known as a perforating gun system or just perforating system, is a crucial tool used in the oil and gas industry to perforate well casings and initiate the process of hydraulic fracturing (also known as 'fracking'). The system consists of a perforating gun loaded with explosive charges or shaped charges that create holes in the well casing and surrounding rock formations. This process allows for the flow of oil, gas, or other fluids from the reservoir rock into the wellbore.

The global Frac Gun Perforating System market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
