The global Freeze Dried Treats for Pets market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

To make freeze-dried snacks for pet cats, choose fresh chicken, beef, fish, duck and other meat, wash and dry them, cut them into cubes, and use a freeze dryer to freeze the meat at minus 30 degrees in a vacuum environment. Use an instrument to dehydrate and dry. The whole process is carried out at low temperatures, allowing the moisture in the food to be removed by sublimating from a solid to a gaseous state.

Pet medical care is the second largest segment in pet industry. In the UK, annual spending on veterinary and other pet services has risen from ?2.6bn in 2015 to ?4bn in 2021, a 54% increase in just six years. According to Vetnosis, the value of the global animal health industry will increase by 12% to \$38.3 billion in 2021. White Paper on China's Pet Healthy Consumption of JD shows that in 2023, there are 13.09 million pets entering middle age and old age. And pet aging is expected to be seen in the next few years. Changes in the age structure of pets will further bring about the development of the pet medical industry.
