A front-mounted mower is a lawn maintenance machine where the cutting deck is located at the front of the vehicle. This design allows for greater visibility and precision in cutting, making it easier to navigate around obstacles and edges. The front-mounted position also enables the deck to reach under shrubs and fences, reducing the need for additional trimming. These mowers often feature zero-turn capability, offering a tight turning radius for efficient maneuvering. They are particularly favored for complex mowing jobs where accessibility and a high-quality cut are essential.
