For the production of fruit juices and nectars fruit concentrates are used in the beverage industry. The fruit is concentrated by extracting water thus making it easy and less expensive for shipping, warehousing, and transportation. They act as natural sweeteners and are also used to produce natural food colors and a variety of confectionery and desserts items. Manufacturers widely use fruit concentrates in various food products so that customers can receive these products in the natural form. Fruit concentrates are available in the form of puree concentrate, liquid concentrate, clear concentrate, frozen concentrate, and powder concentrate forms.

The industry's leading producers are Al Shams Agro Group, Agrana and Juhayna Food Industries, with revenue ratios of 8.09%, 5.35% and 4.91%, respectively, in 2019.
