In terms of geography, APAC was the major revenue contributing region in the global fruit and vegetable processing equipment market and will continue to lead the market over the next four years. As APAC is home to some of the fastest growing economies in the world like India, China, and Indonesia, this market is anticipated to grow significantly

in the region. China is the major revenue contributor and represents the largest market for fruit and vegetable processing equipment in APAC. One of the major factors for the growth of the market is the increased demand for processed foods in developing nations such as China and India. Moreover, a shift in eating habits in countries like China and Japan toward higher value-added foods, such as vegetables and fruit juices, will impel fruit and vegetable processing manufacturers to expand their operations and invest in additional manufacturing capacity in these countries. This will, in turn, contribute to the growth of this market.
