The fruit and vegetable respiration tester is an instrument for the respiration intensity of fruits and vegetables under storage conditions such as room temperature, refrigerators, controlled atmosphere warehouses, and supermarket freezers. The instrument can select breathing chambers of different volumes according to the size of fruits and vegetables, and measure the CO₂ concentration, O₂ concentration, temperature and humidity of the breathing chamber at the same time; and can use two methods of expressing CO₂ concentration and O₂ concentration. It is an instrument suitable for various schools, scientific research institutes, and companies of food, horticulture, fruit, vegetables, foreign trade, etc. for the respiratory intensity of fruits and vegetables.
