According to our LPI (LP Information) latest study, the global FTIR Spectrometer market size was valued at US\$ 299.9 million in 2023. With growing demand in downstream market, the FTIR Spectrometer is forecast to a readjusted size of US\$ 460.8 million by 2030 with a CAGR of 6.3% during review period.

The research report highlights the growth potential of the global FTIR Spectrometer market. FTIR Spectrometer are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of FTIR Spectrometer. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the FTIR Spectrometer market.

FT-IR stands for Fourier Transform InfraRed, the preferred method of infrared spectroscopy. In infrared spectrometer, IR radiation is passed through a sample. Some of the infrared radiation is absorbed by the sample and some of it is passed through (transmitted). The resulting spectrum represents the molecular absorption and transmission, creating a molecular fingerprint of the sample. Like a fingerprint no two unique molecular structures produce the same infrared spectrum. This makes infrared spectroscopy useful for several types of analysis.

FTIR spectrometers (Fourier Transform Infrared Spectrometer) are widely used in organic synthesis, polymer science, petrochemical engineering, pharmaceutical industry and food analysis. In addition, since FTIR spectrometers can be hyphenated to chromatography, the mechanism of chemical reactions and the detection of unstable substances can be investigated with such instruments

We selected a total of 11 companies as samples. The 11 companies account for about 76% of the industry's market share. We can think that this is a relatively concentrated market, mainly because there is a high technical threshold and brand awareness, so the degree of concentration is high. And these are big companies.
