FTO coated glass is tin oxide SnO₂ transparent conductive glass (SnO₂: F) doped with fluorine, referred to as FTO. FTO glass is developed and utilized as a substitute for ITO conductive glass, and can be widely used in liquid crystal displays, photocatalysis, thin-film solar cell substrates, dye-sensitized solar cells, electrochromic glass and other fields. Recently, with breakthroughs in perovskite solar cells, FTO conductive glass has become the best transparent electrode material for perovskite solar cells due to its excellent high temperature resistance.
