FTTx Blown Fibre Cable is an efficient way to install fiber optic cable and facilitates future expansion of optical fiber networks. Fibers can be installed in areas that are hard to reach or that have limited access. Air Blown Fiber is also recommended for environments where there will be many changes and additions to the network. It also allows for duct installation before you know how much fiber is actually required, and so eliminates the need to install dark fibers. It also reduces splicing and interconnection points so optical loss is minimized and system performance is enhanced.

The global FTTx Blown Fibre Cable market size is projected to grow from US\$ 526 million in 2024 to US\$ 909 million in 2030; it is expected to grow at a CAGR of 9.5% from 2024 to 2030.
