Fuel Cell Stack Adhesives & Sealants play a crucial role in fuel cell stacks. They possess excellent sealing capabilities to prevent gas and coolant leakage, ensuring the normal operation of the stack. With strong adhesive properties, they firmly bond various components like bipolar plates and membrane electrode assemblies, enhancing the structural integrity and stability. These adhesives and sealants also offer buffering and shock-absorbing functions to protect internal parts from vibrations and impacts, and good electrical insulation to avoid short circuits. Moreover, they have remarkable resistance to the acidic environment and coolant corrosion, guaranteeing long-term durability and reliable performance in the harsh conditions within the fuel cell stack.
