Fuel injection is the introduction of fuel in an internal combustion engine, most commonly automotive engines, by the means of an injector. Fuel injection systems are vital components in any automotive engine that regulate and monitor the amount of fuel entering the engine cylinders as per requirements. The process of determining the necessary amount of fuel, and its delivery into the engine, are known as fuel metering. Early injection systems used mechanical methods to meter fuel, while nearly all modern systems use electronic metering. Modern fuel injection systems not only regulate the flow of fuel, but also provide additional functions such as multiple, pilot, post injections and rate shaping (scheduling).
