The global Full-band Radio market size is predicted to grow from US\$ 726 million in 2025 to US\$ 1091 million in 2032; it is expected to grow at a CAGR of 6.0% from 2026 to 2032.

In 2025, global sales of full-band radios reached 12.8 million units, with an average selling price of US\$58 per unit. Global production capacity in 2025 was approximately 14.5 million units, with an average industry gross margin of about 26%. A full-band radio is a multi-band radio receiving device capable of receiving AM, FM, SW, LW, and some aviation bands and digital broadcast signals. It is widely used in outdoor travel, emergency communication, radio listening, aviation monitoring, maritime communication assistance, and by radio enthusiasts. Products typically consist of a high-frequency tuning module, a DSP digital signal processing chip, an antenna system, an audio amplification module, a battery-powered system, and a display control unit. They feature high-sensitivity reception, automatic station search, digital frequency modulation, noise reduction, and multi-band switching. Some high-end products also integrate Bluetooth playback, USB charging, solar power supply, and shortwave synchronous detection functions, adapting to complex radio environments and long-distance signal reception needs.

The upstream sector primarily involves suppliers of DSP chips, RF modules, LCD displays, lithium batteries, speakers, PCB circuit boards, plastic casings, and electronic components. Downstream consumption mainly comes from consumer electronics retail, outdoor equipment, emergency communications, the amateur radio market, maritime and aviation auxiliary receivers, and education and research fields. With the growth of outdoor activities, increased demand for emergency communications, the resurgence of shortwave broadcasting, and the upgrading of portable electronic devices, the multi-functional full-band radio market maintains stable growth. Future products will develop towards digitalization, high sensitivity, miniaturization, low power consumption, and

intelligent networking. Meanwhile, the expansion of the emergency rescue, outdoor adventure, radio education, and professional monitoring markets will continue to bring new market demands and business opportunities.
