## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

According to our (LP Info Research) latest study, the global Full Spectrum CBD Products market size was valued at US\$ 1760.9 million in 2022. With growing demand in downstream market and recovery from influence of COVID-19 and the Russia-Ukraine War, the Full Spectrum CBD Products is forecast to a readjusted size of US\$ 2876.3 million by 2029 with a CAGR of 7.3% during review period.

The research report highlights the growth potential of the global Full Spectrum CBD Products market. With recovery from influence of COVID-19 and the Russia-Ukraine War, Full Spectrum CBD Products are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Full Spectrum CBD Products. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Full Spectrum CBD Products market.

The development prospects for Full Spectrum CBD products are quite promising. Full Spectrum CBD refers to a type of CBD extract that contains all the naturally occurring compounds found in the cannabis plant, including cannabinoids, terpenes, and flavonoids. This is in contrast to CBD isolates, which only contain CBD. One of the main reasons for the positive development prospects of Full Spectrum CBD products is the entourage effect. The entourage effect suggests that the various compounds in the cannabis plant work together synergistically to enhance the therapeutic benefits of CBD. This means that Full Spectrum CBD products may have a more potent and effective impact on the body compared to CBD isolates. Additionally, Full Spectrum CBD

products are believed to have a wider range of potential health benefits due to the presence of other cannabinoids such as THC (tetrahydrocannabinol). While THC is known for its psychoactive effects, it also has therapeutic properties that may complement the effects of CBD.
