The global Fully Automatic Solid Phase Extraction System market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Fully automatic solid phase extraction system is an automatic instrument for sample pretreatment and analysis. Solid phase extraction is a commonly used sample preparation technique for the enrichment and cleanup of target analytes. Traditional solid-phase extraction methods usually require manual operations, which are time-consuming and prone to operational errors. The automatic solid phase extraction system realizes the automatic processing and analysis of samples through the automatic operation process and control system, and improves the efficiency and accuracy of the analysis. The automatic solid phase extraction system usually consists of the following main parts: 1. Sampling and sample injection module: responsible for sample collection and injection, and can choose different injection methods according to needs, such as liquid phase sampling, gas phase sampling wait. 2. Solid phase extraction column module: including solid phase extraction column and corresponding mobile phase supply system, used for enrichment and purification of samples. Solid phase extraction columns are usually filled with solid phase materials with specific affinity, such as adsorption resins, solid phase extraction membranes, etc. 3. Elution and analysis module: used to elute the target analyte from the solid phase material, and send the eluate to the subsequent analysis instrument for quantitative analysis. The elution and analysis module usually includes an elution solution supply system, a sampling system, and an analytical instrument interface. 4. Control system: used to control the operating process of the fully automatic solid phase extraction system, including the control and adjustment of sampling, elution, analysis and other steps.

United States market for Fully Automatic Solid Phase Extraction System is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
