The global Fully Threaded Double-ended Bolt market size is predicted to grow from US$ 568 million in 2025 to US$ 788 million in 2032; it is expected to grow at a CAGR of 4.9% from 2026 to 2032.

In 2024, global sales of fully threaded double-ended bolts reached 1.32 billion units, with an average selling price of US$0.42 per unit. This product is a threaded fastener, commonly used for the assembly and connection of flanges, equipment foundations, pressure vessels, and structural components. It features high load-bearing capacity, strong installation stability, and reusability. Its main upstream raw materials are medium carbon steel, alloy steel, stainless steel, and surface galvanizing chemicals, accounting for approximately 72% of the total cost. Major suppliers include Baosteel, POSCO, Ansteel Group, Acerinox, and Nippon Steel. Global total production capacity is approximately 1.5 billion units, with an average gross profit margin of 14%-18%. Downstream application industries mainly include machinery and equipment (approximately 35%), construction engineering (30%), energy and chemical plants (20%), automobile manufacturing (10%), and railway bridges (5%), with the construction and equipment manufacturing sectors having the most concentrated demand. The unit consumption of upstream steel is approximately 0.12 kg/unit, and the combined consumption of galvanizing solution and rust-preventive oil is approximately 0.005 kg/unit. In the future, fully threaded double-ended bolts will develop towards high-strength alloying, automated cold heading, and green anti-corrosion coatings to meet the industrial demands for high pressure, corrosion resistance, and automated assembly.
