The global Furniture Rental Service market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

Furniture rental service refers to a business model where companies provide furniture items on a temporary basis to individuals, businesses, or events. Instead of purchasing furniture outright, customers can rent furniture for a specific duration, typically ranging from a few days to several months. Furniture rental services offer a convenient and flexible alternative to traditional furniture ownership.

The global furniture rental service market has been experiencing significant growth in recent years. The market size is influenced by factors such as changing consumer preferences, increasing urbanization, rising awareness of sustainability, and the growing popularity of shared economy models. The market is expected to continue growing as more individuals and businesses opt for flexible and cost-effective furniture solutions. The demand for furniture rental services varies across different regions of the world. Developed regions like North America and Europe have a more established market for furniture rental services due to higher disposable incomes, urban lifestyles, and greater acceptance of shared economy concepts. However, emerging markets in Asia Pacific, Latin America, and the Middle East are also witnessing increased demand as consumer awareness and affordability improve.
