Game translation service is a translation service specially provided for game developers and publishers, aiming to translate game content from one language to another to meet the needs of players in different regions. Specifically, game translation services cover various text elements in the game, such as dialogues, storylines, mission descriptions, menu options, etc., as well as the translation and adjustment of sounds, images, user interface and other elements in the game. In this process, in addition to basic language translation, cultural adaptation also needs to be considered, because different cultures may have different expectations and interpretations of certain elements in the game.

The global Game Translation Service market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
