## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Gamma-ray spectroscopy is the quantitative study of the energy spectra of gamma-ray sources, such as in the nuclear industry, geochemical investigation, and astrophysics. Most radioactive sources produce gamma rays, which are of various energies and intensities. When these emissions are detected and analyzed with a spectroscopy system, a gamma-ray energy spectrum can be produced. A detailed analysis of this spectrum is typically used to determine the identity and quantity of gamma emitters present in a gamma source, and is a vital tool in radiometric assay. The gamma spectrum is characteristic of the gamma-emitting nuclides contained in the source, just like in an optical spectrometer, the optical spectrum is characteristic of the material contained in a sample.

The global market for Gamma Ray Spectroscopy is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

The APAC Gamma Ray Spectroscopy market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The United States Gamma Ray Spectroscopy market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The Europe Gamma Ray Spectroscopy market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The China Gamma Ray Spectroscopy market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

Global key Gamma Ray Spectroscopy players cover AMETEK Inc, Thermo Fisher Scientific, Mirion Technologies, Inc, Teledyne FLIR LLC and Linde Plc, etc. In terms of revenue, the global largest two companies occupy a share nearly % in 2021.
